

Attention Site Investigators and Study Coordinators for the TACT Study:

Effective immediately, weekly infusion visit and lab data must be entered into TrialMaster® and signed by the end of business on Friday for patient visits scheduled for Wednesdays and Thursdays. Patient visits scheduled for Fridays and Saturdays must have data entered by end of business on Monday.

This time sensitive process is necessary for the Pharmacy to have adequate time to prepare/ship infusions, to ensure that your patients have their infusions available when they arrive at your site and more importantly for PATIENT SAFETY.

If this cannot be done for each patient, please email TACT Clinical Trial Manager stating the reason(s).

Any questions regarding this process should be directed to TACT Clinical Trial Manager at 305-674-2049.
